Folder Navigation for WTParts and Documents. 4

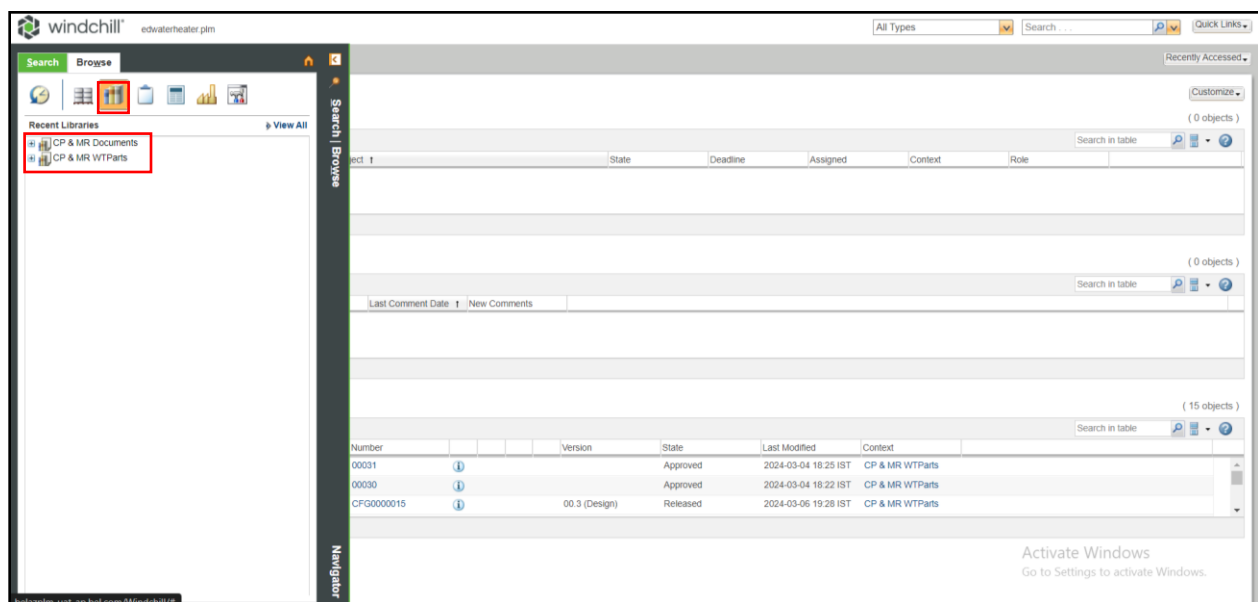

Folder Navigation for CAD Parts. 8

Folder Navigation for WTParts and Documents

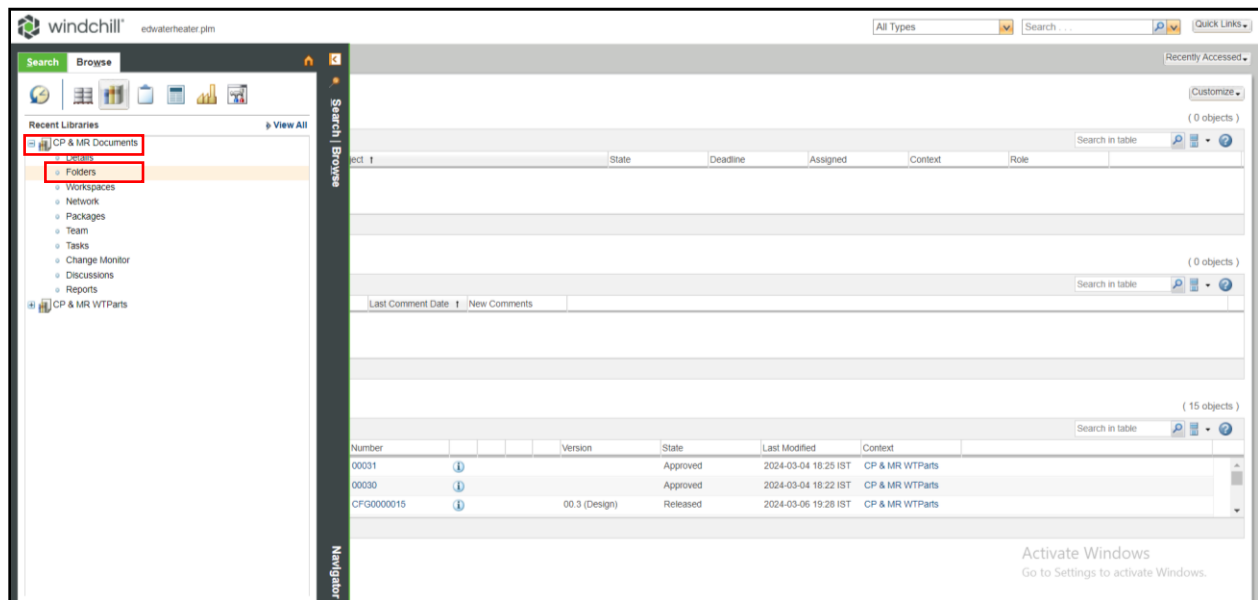

- Home Page will open after user login with their Windchill credentials.
- Here we are using edwaterheater.plm user id as an example.

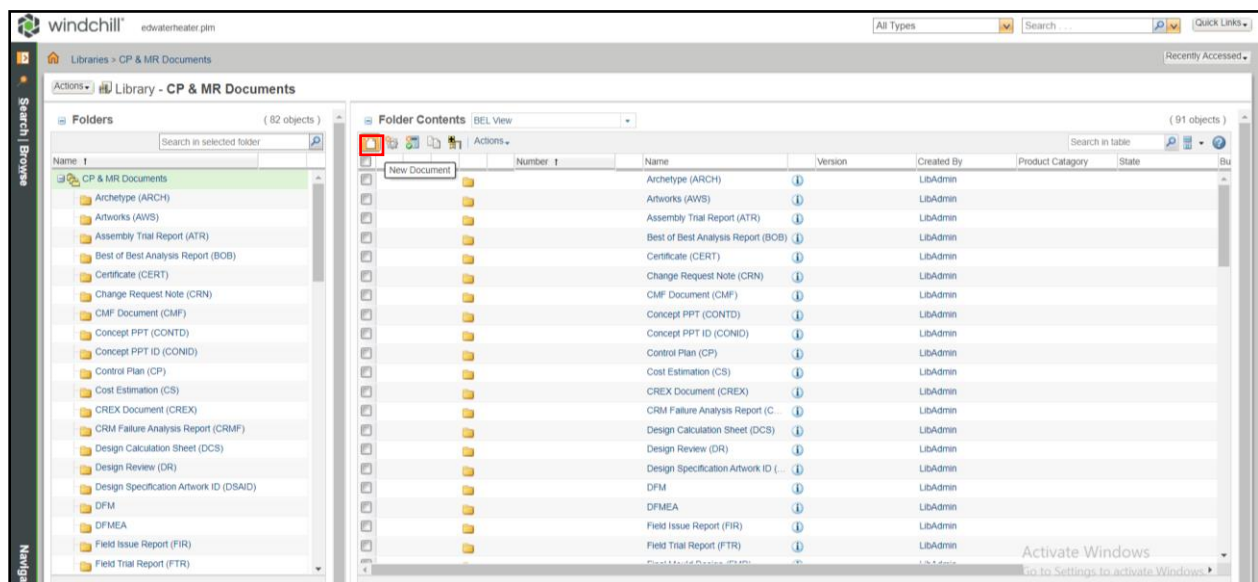

- Then expand the Navigator panel and click on Browser, then go to Library Context.
- In library, user will have their respective libraries list for documents (**CP & MR Documents**) and WTParts (**CP & MR WTParts**).

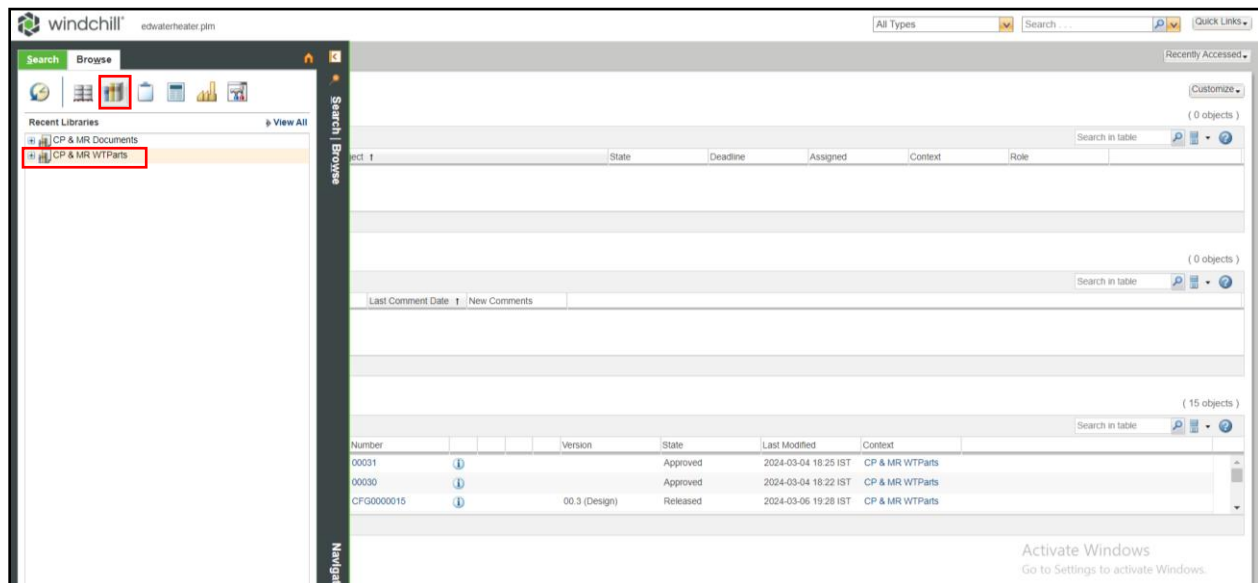

- To open the folders, expand the Context and click on Folders.

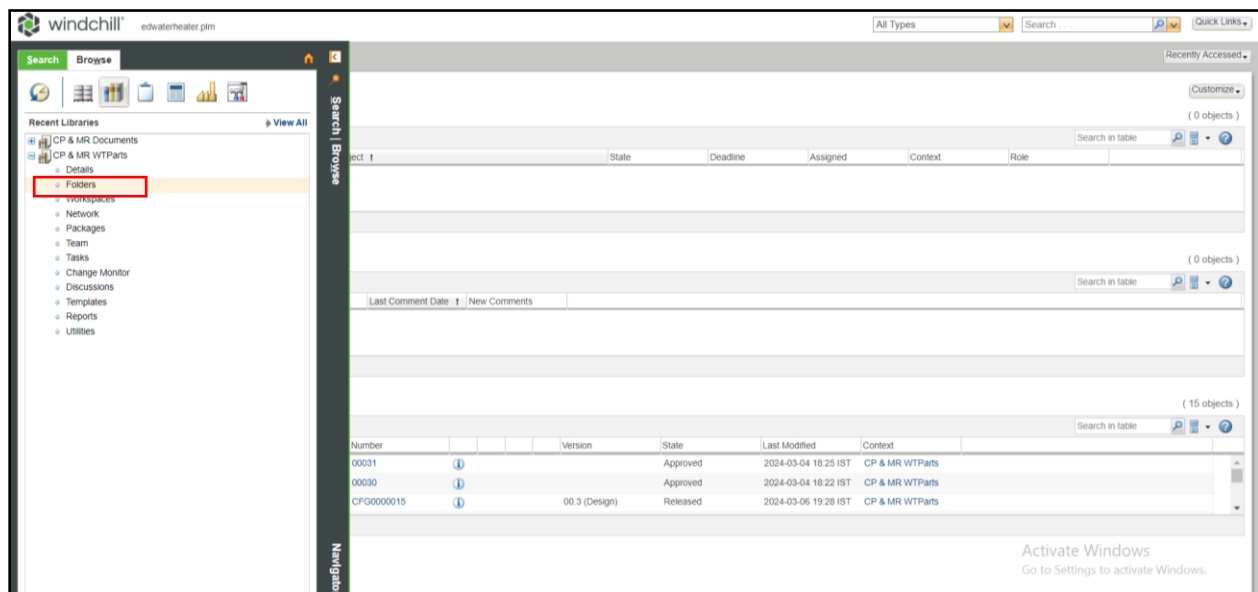

- In Folders user can find different folders based on the Document Types.
- When user creates the new document it will get stored to its folder location based on its document type.

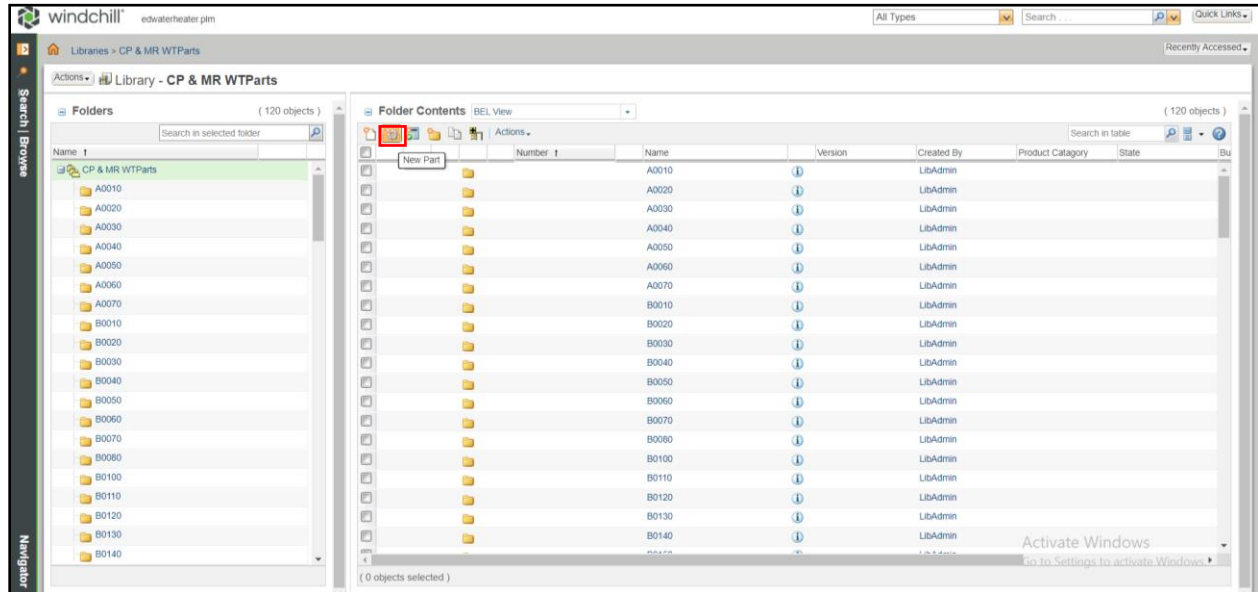

- Again, for WTParts expand the navigator panel then go to Browser and select the WTParts library.

- To open the folders expand the Context and click on Folders as shown below.

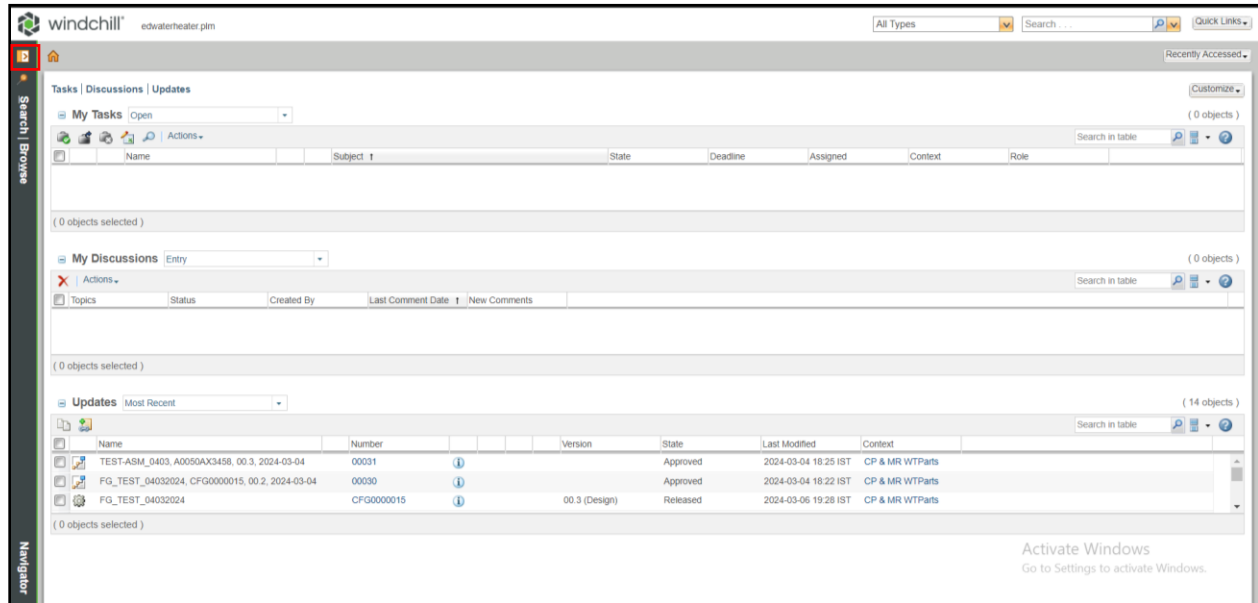

- User will create new WTParts using New Part action shown below.
- Folders are created based on their Base Code value, so when user select the Base Code while creating the WTPart that Part automatically gets stored to its location based on their Base Code value.

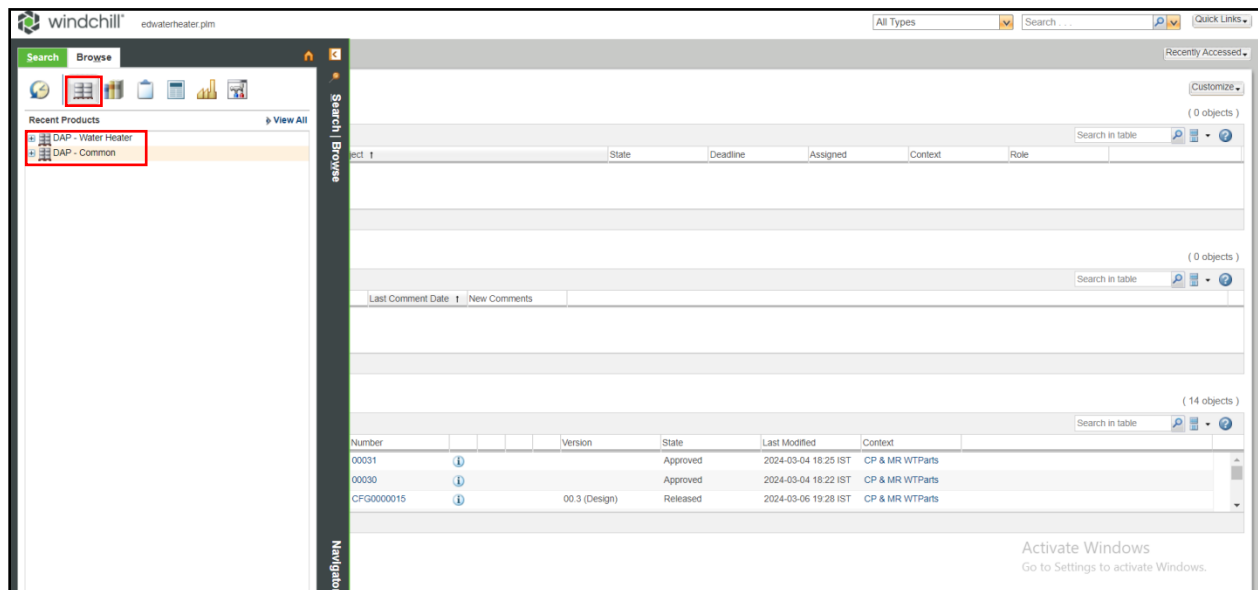

Folder Navigation for CAD Parts.

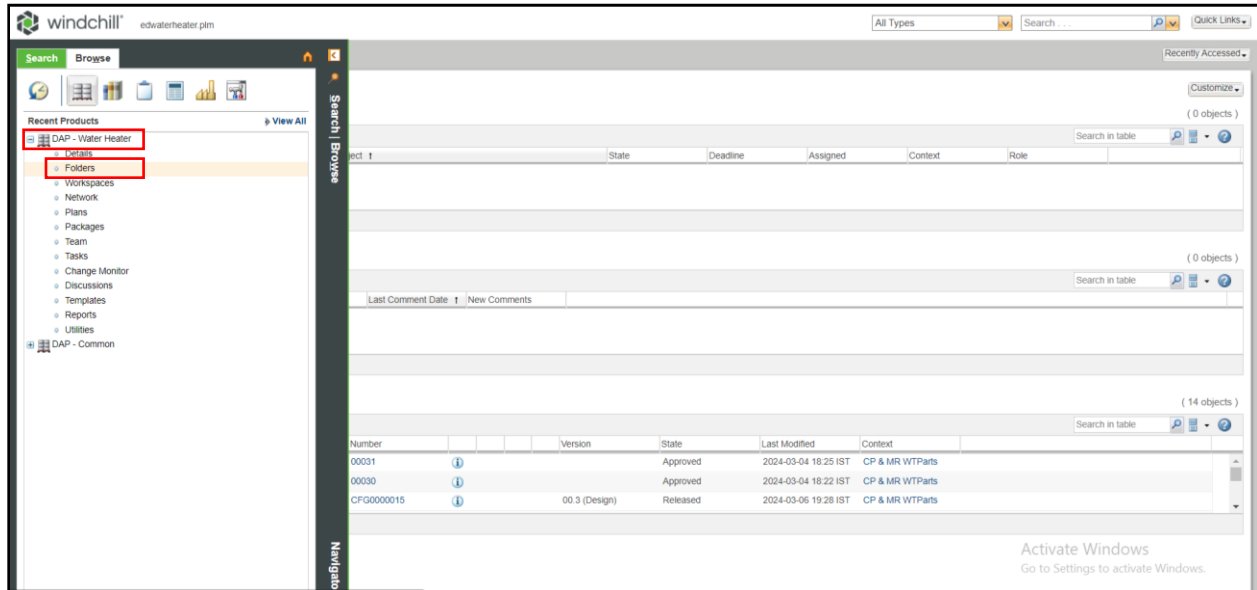

- Windchill Home Page open after windchill login and then expands the Navigator Panel.

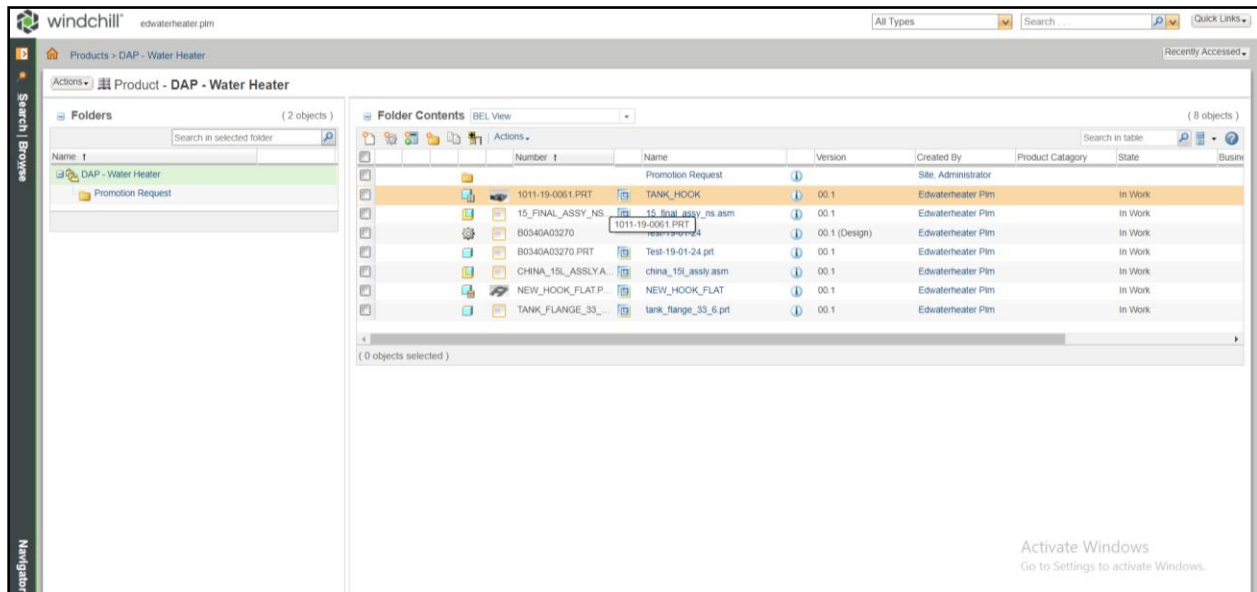

- For CAD Part user will go to Product Context.
- User will have the Product contexts based on their roles.

- To check folder data expand the product and click on Folders.

- As below user will get the CAD parts which they have check-in.

- Same for the other Product Context.

Windchill interface showing the 'Recent Products' list. The 'DAP - Common' product is highlighted. The 'Folder Contents' table displays 8 objects:

Number	Name	Version	Created By	Product Category	State
	Promotion Request		Site Administrator		
1011-19-0061 PRT	TANK_HOOK	00.1	Edwaterheater Pim		In Work
